Pole-Top Brackets

All pole-top and wall brackets with the exeption of the aluminium tubular brackets are made from galvanised steel.

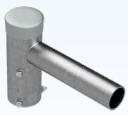

Powder coating in any RAL colour is possible at extra charge.

Connection cable

The H07RN-F rubber hose cable with flexible conductors and pre-assembled wire end ferrules is connected to the luminaire in the desired length upon delivery.

The cable is flame-retardant and resistant to oil, ozone and UV radiation.
It is therefore suitable for permanent use in outdoor areas, but also for installation in dry, damp and wet rooms.
