

VARIO

Always perfectly adapted!

Variable and universally applicable

VARIO luminaires from SCHUCH

 **SCHUCH**

VARIO LIGHTS – PERFECT ADAPTATION TO EVERY SITUATION

No luminaire offers as many advantages in a single version like a VARIO. The times when you had to choose from many the right luminaire for your needs or had to keep several luminaire types on stock are over. Removing and disposing of luminaires when requirements change is also a thing of the past with VARIO luminaires.

ALWAYS THE RIGHT LIGHT AT HAND

The luminous flux can be adjusted almost infinitely according to your wishes or requirements – and not just only during the initial installation. It can be changed at any time to customize the lighting. Be it because the use of the use in different areas and therefore the lighting requirements change, or simply because the lighting is perceived as too bright or too dark.

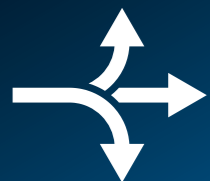

VARIO: maximum flexibility and economy!

UNBEATABLE ADVANTAGES

Variably adjustable luminous flux

- Almost infinitely adjustable
- Tool-free, can be changed at any time
- DIP switch in the luminaire or NFC version (setting via app)

Universal use

- A single type instead of many variants
- Always the right luminaire on hand

High reliability

- Long-term spare parts supply
- 5-year system guarantee

Maximum economy

- Light exactly as required
- Maximum energy savings
- Optimized storage

WHAT IS NFC?

Near Field Communication is an international transmission standard with which data, based on RFID technology, is transmitted over short distances using electromagnetic induction.

This allows the luminaires to be parameterised via an app before they are installed. This simple, quick and tool-free adjustment of the luminous flux can of course also be changed at any time. All you need is a smart end device (tablet/smartphone) and the corresponding control app.

QUALITY AND EFFICIENCY

Indicators for sustainability and resource conservation

There is no alternative to quality. This is because high-quality luminaires are not only inexpensive over their life cycle, but also contribute directly and indirectly to reducing environmental pollution and conserving valuable resources on various levels. This is particularly true for VARIO luminaires. Almost all SCHUCH outdoor luminaires are available in VARIO design. There are also many VARIO versions in other product groups such as moisture-proof luminaires – and the trend is rising.

STANDARD VERSION

High quality

- ▶ Longer service life, **highest reliability**
- ▶ Repairable and upgradeable **longer service life**
- ▶ **Long-term availability** of spare parts

High efficiency

- ▶ **Lower energy costs**
- ▶ **Shorter amortization times**
- ▶ **Lower CO₂ emissions**

VARIO VERSION

Additional advantages

- ▶ **Variable adjustment** of the luminous flux
- ▶ Always as required, therefore **maximum energy saving**
- ▶ Changed requirements: **multiple use** instead of disposal

SUSTAINABLE, ENVIRONMENTALLY FRIENDLY & RESOURCE-SAVING

The VARIO principle

Quality-conscious, sustainable and future-oriented – SCHUCH luminaires are unmistakable brand products “Made in Germany”

Designed by our own engineers and technicians, manufactured in our factory in Germany, extensively tested in the company’s own accredited laboratory centre and 100% functionality tested during assembly, the focus is always on quality, functionality, sustainability and cost-effectiveness of the lights. With this comprehensive philosophy, SCHUCH has been controlling all quality-defining processes itself for 130 years.
